FOOD SAFETY TRAINING

VERIFICATION & VALIDATION TRAINING

Verification and Validation are special programs that provide feedback and focus on improving all other food safety programs.

What if you could simplify these programs by understanding their purpose and differences?

This online course teaches how to align Verification and Validation Programs with your organization's needs and still meet regulatory, customer, and certification requirements.

THIS TRAINING WILL HELP YOU:

- Understand how Verification and Validation Programs relate to other food safety programs.

- Understand the differences between Verification and Validation activities.

- Outline the purpose of Reviews.

- Complete a Product Analysis.

- Understand aspects of Environmental Monitoring.

MODULE TOPICS:

- Program Organization

- Verification

- Validating and Managing Food Safety

1 HOUR OF COURSE CONTENT
